

Spirent TrafficCenter

Web Application for Network Traffic Testing

Network Testing Made Easy

Network Answers—All the tools needed for network traffic flow validation and diagnosis delivered in one application

Cost-Effective Solution—Application up and running with minimal investment through the use of virtual technology, also compatible with existing Spirent hardware

Quality of Experience—Ease of use, improved productivity and user experience, pre-configured topology profiles help save time

Trusted Partner—Benefit from decades of testing experience with Spirent as your guide through a world of complex network testing

Convenient Access—Web application for hybrid network traffic testing, available when and where you need it

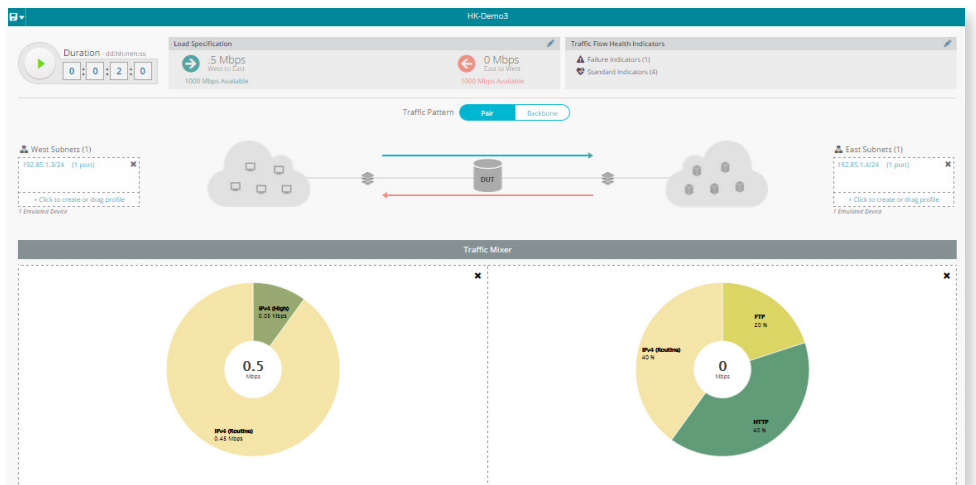

Application Overview

Spirent TrafficCenter is a new web application that provides layer 2, layer 3 with synthetic layer 7 traffic tests that are easy to configure and execute even for users doing traffic testing for the first time.

TrafficCenter leverages decades of Spirent's network testing experience, incorporating the smarts within the application and allows you to test faster without requiring deep protocol-specific knowledge. TrafficCenter application includes virtual ports that can be deployed on demand and works with Spirent TestCenter hardware and virtual ports. TrafficCenter combines ease of use with accelerated productivity, and provides convenient access to network traffic testing tools to Enterprises for the first time. The application's browser-based technology with an HTML5 interface can be easily managed from anywhere, with any device.

In a world where hybrid traffic testing has become a necessity as complex virtual networks are deployed, TrafficCenter removes the barriers to network testing by offering an affordable, web-based solution for Enterprise users.

TrafficCenter—NetworkTesting Made Easy

With TrafficCenter's intuitive, easy-to-use features, quick tips, drag and drop functionality, profile sharing and interactive results summary, network testing is made easy.

Introducing TrafficCenter

New web application targeted to users looking for an easy way to verify network connectivity and design

Ideal for enterprise-focused testing, for those planning to deploy private or public cloud services

Incredibly simple user interface for test creation, for users looking to find a less complex, easier-to-use application compatible with Spirent hardware

Features & Benefits

- Web-based application runs on any popular browser and operating system
- Easy-to-use test management dashboard, intuitive feature-set (quick tips, drag & drop functionality) to get you answers in a matter of minutes
- Industry-standard traffic flows, traffic mixes, and subnet profiles
- Application library for sharing of pre-configured topology profiles
- Accelerated testing-cycles through duplication and editing of saved tests
- Included virtual ports
- Compatible with Spirent hardware

Ordering Information

Description	Part number
Hardware TrafficCenter 1-year subscription	TMV-TC-HARDWARE-1YR
Standard TrafficCenter 1-year subscription	TMV-TC-STANDARD-1YR
Premium TrafficCenter 1-year subscription	TMV-TC-PREMIUM-1YR

Easy-to-read historical results for test duration offer drill down capability to find what endpoints are experiencing outages.

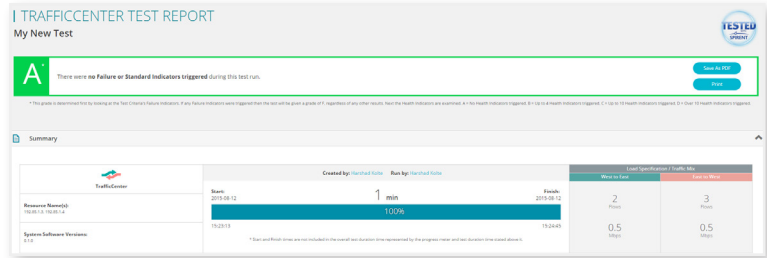

About Spirent Communications

Spirent Communications (LSE: SPT) is a global leader with deep expertise and decades of experience in testing, assurance, analytics and security, serving developers, service providers, and enterprise networks.

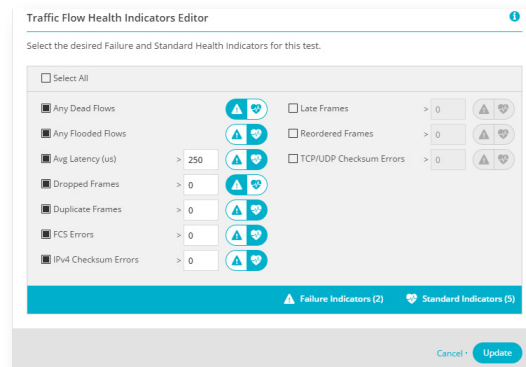

We help bring clarity to increasingly complex technological and business challenges.

Spirent's customers have made a promise to their customers to deliver superior performance. Spirent assures that those promises are fulfilled.
