

Spirent TTplugin GPIB & RS232

General Purpose Interface Bus & Recommended Standard 232

Spirent services

Spirent Global Services provides a variety of professional services, support services and education services—all focused on helping customers meet their complex testing and service assurance requirements.

For more information, visit the Global Services website at www.spirent.com or contact your Spirent sales representative.

Spirent TTplugin GPIB

General Purpose Interface Bus

The General Purpose Interface Bus based in IEEE 482.2 is a parallel 8Bit bus which is mostly used for test equipment. The GPIB port plugin enables TTworkbench users to communicate via GPIB with the system under test.

Spirent TTplugin RS232

Recommended Standard 232

The Recommended Standard 232, specified by the Electronics Industries Association, is an interface between data terminal equipment and data communication equipment deploying serial data exchange. The RS232 port plugin enables TTworkbench users to communicate via RS232 with the system under test.

Features & highlights

- Multiple test components and multiple-port mapping
- Freely combinable with additional test access (TTplugins)
