

Spirent TTplugin Selenium

Selenium WebDriver for Browser Automation

Selenium WebDriver automates web browsers, web applications and web-based administration tasks for testing purposes by providing a collection of language specific bindings. TTplugin Selenium uses this facility to ease the creation of browser-based regression automation suites and tests in TTCN-3.

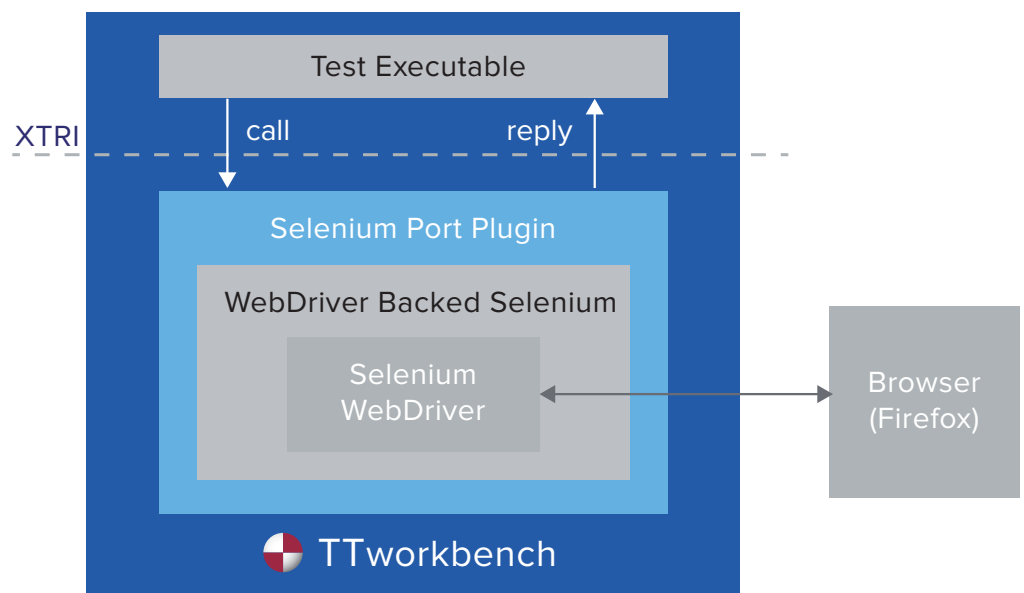

The Selenium WebDriver for Browser Automation can be used to test or control websites and web applications. TTplugin Selenium brings the power of Selenium to the TTCN-3 world, providing a TTCN-3 language binding for the WebDriver backed by Selenium RC API.

Features & highlights

- Creating browser-based regression automation suites and tests
- Increased automation grade for test suites where interaction with web interfaces is required
- Support for multiple browser instances by using one TTCN-3 port per instance
- No Java/JavaScript coding effort
- Freely combinable with additional test access (TTplugins)

Requirements

- Mozilla Firefox 40 or 41
- Java 7 or higher
