

Spirent TestCenter – TTplugin

Control Spirent TestCenter Chassis via TTCN-3 Test Cases

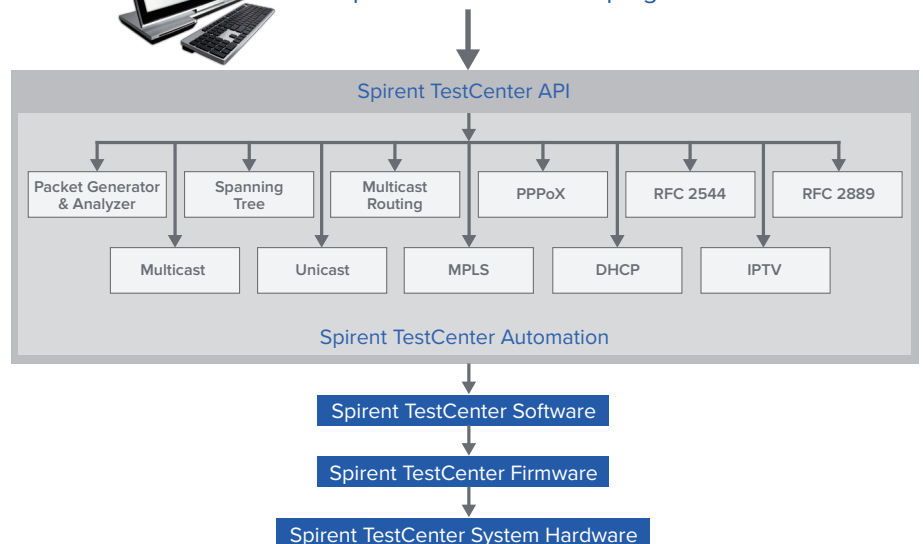

This plugin allows customers to automatically control Spirent TestCenter chassis via TTCN-3 test cases. It uses the Spirent TestCenter API - a powerful interface for implementing custom test cases in a regression environment - to connect to the Spirent TestCenter chassis. Users are able to create test configurations, to run test cases, and to retrieve test results.

Features & benefits

- Automate Spirent TestCenter through TTCN-3
- Create and manage Spirent TestCenter test configurations
- Create and manage Spirent TestCenter automation objects and their attributes
 - For instance traffic generation, analysis, and capturing events on the devices
- Execute tests based on existing test configurations
- Retrieve detailed test results
- Ready to use - no additional coding efforts
- Freely combinable with additional test access (TTplugins)

Test Automation Platform TTworkbench & Spirent TestCenter - TTplugin

Please consult the integrated TTworkbench User's Guide for more details on the TTCN-3 API usage. For a deeper understanding of the Spirent TestCenter Automation please have a look at Spirent's Overview Manual.
